# CLARITY™

*Anti-reflective glass for architectural applications*

**CLARITY™ offers the perfect viewing experience!**

CLARITY™ anti-reflective glass is the ideal product for any application where a too strong reflection is a limitation: from a shop window that loses attractiveness through too much reflection or a viewing platform that loses its visual accuracy through distracting reflection, to a restaurant where its breathtaking view disappears when the sun sets. CLARITY™ glass offers the perfect solution for all applications!

## **CLARITY™ benefits**

- ◆ Excellent optical properties
- ◆ Anti-reflective glass
- ◆ Numerous possibilities in single, insulation and laminated glass
- ◆ Toughenable for safety
- ◆ In addition to the standard dimensions also available in the dimension 3210 x 6000 mm: ideal for processing purposes
- ◆ Flexible for every application or every purpose
- ◆ CLARITY™ is available in various sizes and with thicknesses from 3 to 15 mm
